IT Service Level Policy

Document ID: ITSM-POL-002 | Version: 1.4 | Effective date: 2026-04-01

Owner: IT Service Management | Approved by: Chief Information Officer (CIO)

Review cycle: Annual | Classification: Internal

1. Purpose

This policy sets the service levels the IT Service Desk and IT resolver teams commit to, so that employees know what to expect when they report a problem or request a service.

2. Service desk hours

- Monday to Saturday: 07:00 to 22:00, headquarters local time.
- Sunday: 09:00 to 18:00.
- P1 and P2 incidents are handled 24 hours a day, 7 days a week, through the on-call phone line.

3. How to contact IT

- ServicePoint portal at servicepoint.brightwick.example, the preferred channel for everything except P1 and P2 incidents.
- Phone: extension 4357.
- Walk-up: the IT Bar on Level 2 at headquarters, 08:30 to 17:30 on weekdays.
- Chat: through the ServicePoint portal during service desk hours.

Report P1 and P2 incidents by phone, not through the portal.

4. Priority definitions

Priorities are defined in the Ticket Priority section of the IT Service Desk Runbook: P1 is a company-wide outage or critical security incident, P2 is a major team blocked with no workaround, P3 is an individual user blocked or degraded with a limited workaround, and P4 is a standard request, information request or low-impact issue.

5. Incident service levels

Priority	First response	Resolution target	Update frequency
P1	15 minutes	4 hours	Every 30 minutes
P2	30 minutes	8 hours	Every 60 minutes
P3	4 business hours	3 business days	Daily
P4	1 business day	10 business days	On change

P1 and P2 targets run around the clock. P3 and P4 targets are measured in business hours, which are 09:00 to 18:00, Monday to Friday, excluding public holidays.

6. Service request targets

Request	Target
New starter account	Created 2 business days before the start date
Software from the Software Portal	Immediate, self-service
Software not in the portal	10 business days for the security review
Shared mailbox access	1 business day after owner approval

Request	Target
File restore	1 business day for a single file or folder

7. Escalation matrix

Level	Team	Responsibility
L1	IT Service Desk	Logs every ticket, resolves common issues, assigns the rest
L2	Resolver teams: Endpoint, Network, Identity, Retail Systems, Messaging	Specialist troubleshooting and fixes
L3	Engineering teams and vendors	Complex faults, code changes and vendor cases

A ticket is escalated to the next level when 75% of its resolution target has passed without a fix in sight. For P1 and P2 incidents that are at risk of missing their target, the service desk team leader informs the Head of IT Operations.

8. User responsibilities

Users help IT meet these targets by giving clear information, staying available to answer questions and testing fixes. A ticket waiting for the user's reply is closed after 5 business days with no response, after three reminders.

9. Reporting

IT Service Management reports performance against these service levels every month to the Chief Information Officer, and reviews the targets every year.
